

Opti-Gard™ Solo (OPS)

The Most Technically Advanced Low Pressure Rupture Disc

Peripherally scored on the vent-side for accurate burst control Opti-Gard™ SoLo is an advanced, reverse acting rupture disc. With a 95% operating to burst pressure ratio and performance tolerance of 3% Elfab offer Opti-Gard™ SoLo as a single disc solution across a wide range of sizes and burst pressures.

Designed for low pressure applications from 2Psig, Opti-Gard™ SoLo is a unique reverse acting rupture disc suitable for liquid, gas and vapour. Its innovative design combines a patented geometric shape with state-of-the-art manufacturing process and is unique in offering non-invasive detection as standard.

- Tested to over 100,000 cycles
- Non-fragmenting design
- Manufactured in Hastelloy as standard
- Full vacuum service
- Standard 2 week lead time
- Allows for potential stock reduction of up to 65%
