

## Vac-Gard/Posi-Gard (VG/PG)

### Ultra low pressure reverse acting disc.

This range of composite reverse acting discs is ideal for the relief of vacuum and over pressure situations.

Both products offer non-fragmenting opening and as a result of their modular content can be offered to meet a broad range of non-standard specifications and applications.

Come manufactured as standard with non-invasive detection

- Suitable for ultra low pressures
- Suitable for gas or vapour
- Operating ratio up to 60%
