

Rupture Disc Holders

Ensures correct performance of Elfab's rupture disc range

Designed and manufactured specifically to ensure the correct performance of Elfab's rupture disc range when fitted between flanges. Where applicable the holders are pre-configured to accept the ATEX approved integral Flo-Tel™+ detection system.

Elfab's rupture disc holders should not be modified or used with other manufacturers discs. To ensure the correct performance of a rupture disc it must be used in its correct holder as specified by the manufacturer. Elfab offer industry leading lead-times of 1-2 weeks on holder sizes up to 300mm.

- High levels of corrosion resistance
- Superior leak tightness
- Produced to suit all internationally recognised flange standards
- Assured alignment via location between flange bolts
- Available in Stainless Steel or Hastelloy
- Bolted / pre-torque holders available on request
