

Customised Products

Working to a unique "design for manufacture" approach

Uniquely manufactured per application Elfab's OE rupture discs are specifically designed to meet individual customer requirements. Whether it is a complex one-off unit or high volume price sensitive OEM product Elfab will develop a solution to meet specific application requirements. OE products require no flanges and are simply connected to the system requiring protection.

Elfab combine CAD/CAM design with precision manufacturing all from one location. Elfab offer state-of-the-art manufacturing capability including; Electron Beam welding, CNC machining, high volume machining, automatic assembly, 5 axis laser cutting as well as advanced testing and inspection facilities to create a product with the highest possible specifications.

- Industry best 2 week lead times
- Award winning manufacturing capability
- World-class supply chain management
- Leak tight designs
