

Paperless Installation Guides

As an ISO-14001 approved company Elfab pride itself on acting environmentally responsibly. Elfab are constantly looking for ways to reduce the levels of paper wastage for both themselves and customers. As a result Elfab will no longer be issuing paper installation guides with product deliveries. Instead electronic copies will be sent to customers as well as being available to download from our website. If you would like a hard copy of these installation guides or more information on the process please do not hesitate to contact us.

Manufacturing Investment Results in Improved Lead Times

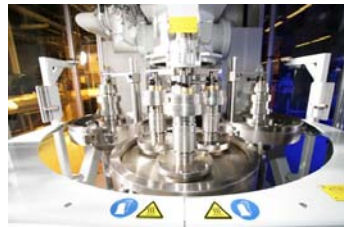

Elfab has improved its manufacturing resources by investing heavily in an ongoing development program.

Over £2million has been invested in some of the most advanced manufacturing equipment available on the market. This investment has seen Elfab introduce equipment to further

improve its in-house manufacturing capability and capacity.

In-house testing and inspection facilities ensure a high quality product

In-house electron beam welding capability allows Elfab to produce products with excellent leak tightness.

Elfab already offer some of the best lead-times within the rupture disc industry, and with the additions of the new equipment Elfab can now offer a standard 2 week lead time on most of its product range. Elfab also offer a

fast-track service allowing deliveries to be made within 24hours where necessary.

ATEX Zone 0 Approval for Test-Tel™

The industry's first rupture disc installation tool has now been awarded ATEX approval. The low cost portable tool is proving to be an indispensable device at installation and maintenance stages for a "right first time" approach.

Innovation Award Win for Detection System Radio-Tel™

Elfab were the Tyneside and Northumberland winners of the Innovation award at last months North East Business Awards.

Elfab's Radio-Tel™ product beat off stiff competition to win the award. As the first ATEX approved wireless detection system available on the market

Radio-Tel™ uses the latest wireless technology to monitor the state and temperature of a process. Suitable for sites of all sizes Radio-Tel™ provides immediate process change alerts without time consuming and expensive wiring. Elfab are currently offering a Radio-Tel™ "Starter Pack" promotion at a heavily reduced rate.
